## **INTRODUCTION**

In accordance with the Professional Standards Division Standard Operating Procedures 212.0, this report has been generated for the administration and personnel assigned to the Professional Standards Division of the Bryan Police Department. The figures were generated from the Professional Standards Database.

The information found in this database and stated in this report is statistical in nature. The purpose of the database is to find trends in officer activity that can be analyzed by the administration. All of the information contained in this report should be looked at objectively by those with the experience and knowledge necessary to make an educated analysis.

The material in this report was compiled from Bryan Police Department records from January 1, 2005 through December 31, 2005. All police officers employed during the time period are included in this report regardless of their employment status at the time of printing.

## METHODS OF CALCULATION

The Professional Standards Database is capable of generating many reports for each of the types of data collected. In most of the reports and tables, the calculations should be obvious based on the information collected. In others, the data may appear to be “inaccurate” because the numbers will not add up to the totals. This is especially apparent in the Use of Force tables. The reason for this is the differences in the methods of calculation.

For example, Use of Force statistics can be calculated in three ways. A “tally” of the uses of force can be calculated:

1. **By record number.** The number of different incidents, or record numbers, for an officer can be counted.

Officer Jones: 3

03-UF012  
03-UF017  
03-UF125

2. **By involved subjects.** The numbers of people that have been involved in a Use of Force with that officer are counted.

Officer Jones: 5

03-UF012	James Mitchell
	Derrick Paul
03-UF017	Jesse Marks
03-UF125	Michael Smith
	Peter White

3. **By types of force.** Each different use of force for each involved person can be counted.

Officer Jones: 9

03-UF012	James Mitchell	Empty hand control
		Firearm pointed at subject
	Derrick Paul	Empty hand control
03-UF017	Jesse Marks	OC Spray
		Empty hand control
03-UF125	Michael Smith	Empty hand control
		Firearm pointed at subject
	Peter White	Firearm pointed at subject
		OC Spray

## FORMAL COMMENDATIONS

		7A	Primary	Yes	6-145
Where Pursuit Began			Where Pursuit Ended		
100 North SH6			SH and FM 159		

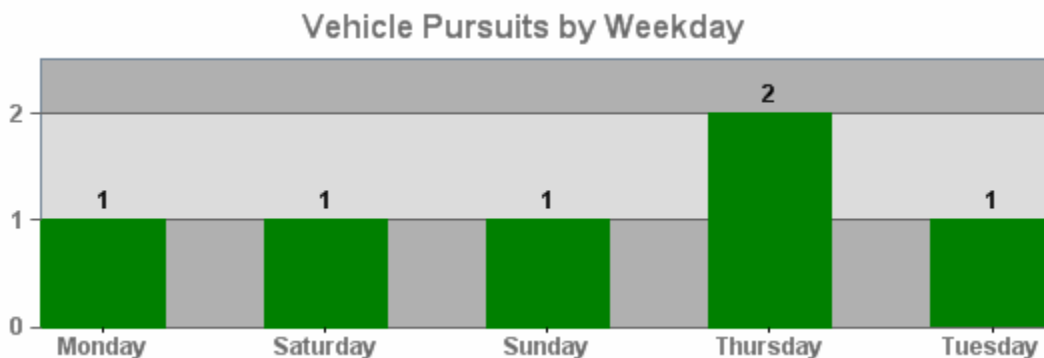

Bryan police officers initiated vehicular pursuit six times in 2005. Pursuits were studied in reference to sector of pursuit, day of week, traffic conditions, road conditions, length in minutes, reason for initiation of pursuit, capture of defendant, resulting injury, resulting property damage, policy compliance, and disciplinary action to officers. Additionally, pursuing officers were studied as to shift assignment and experience level. Corresponding graphs are included at the end of this section.

**Sector:** No significant pattern is noted. Sectors 6Z had two pursuits (33%). 6A, 4Z, 4A, and 7A each had one pursuit apiece.

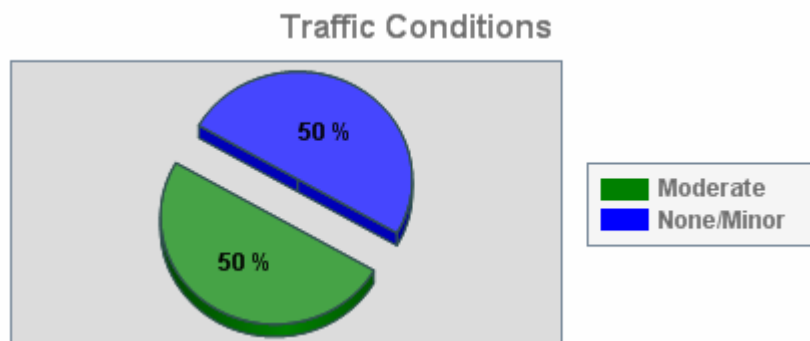

**Figure 12**

**Day of the week:** There is no correlation between day of the week and amount of incidents. Sunday, Monday, Tuesday and Saturday each had one pursuit while Thursday had two pursuits.

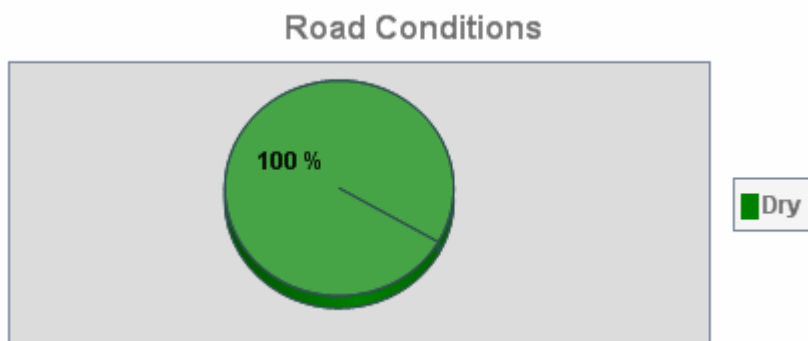

**Figure 13**

**Traffic conditions:** The traffic conditions were reported as three (50%) with moderate traffic and three (50%) with minimal or no traffic.

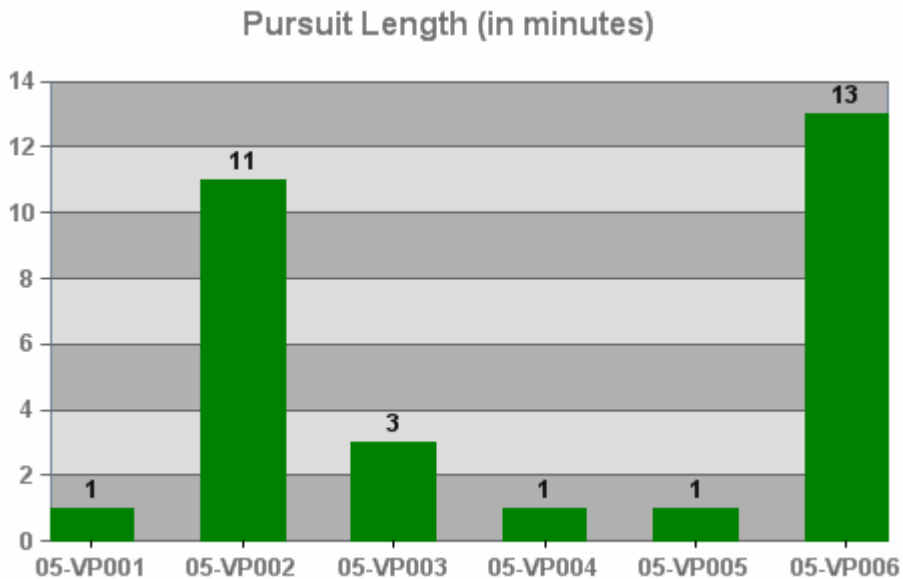

**Figure 14**

**Road conditions:** 100% of the pursuits took place on dry road conditions.

**Figure 15**

**Length in minutes:** Three of the pursuits were timed at one minute apiece; the longest duration was thirteen (13) minutes. The average time elapsed was calculated at approximately five (5) minutes.

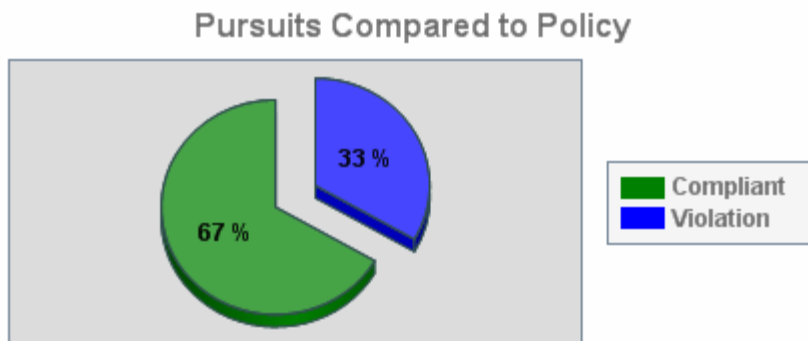

**Figure 16**

**Reason for initiation:** Two of the pursuits were initiated because the driver was suspected of driving while intoxicated. Both pursuits resulted in DWI charges being filed. The other four were initiated for various reasons including: possible stolen vehicle, possible hit and run, supervisor's orders, and an agency assist.

**Results:** Four (44%) of the pursuits resulted in a capture. No charges were made in the possible stolen vehicle and charges are pending in College Station in the possible hit and run. The one pursuit initiated per supervisor's orders resulted in a charge of felon in possession of a firearm being filed. Two (22%) pursuits resulted in property damage and one (11%) resulted in minor injuries.

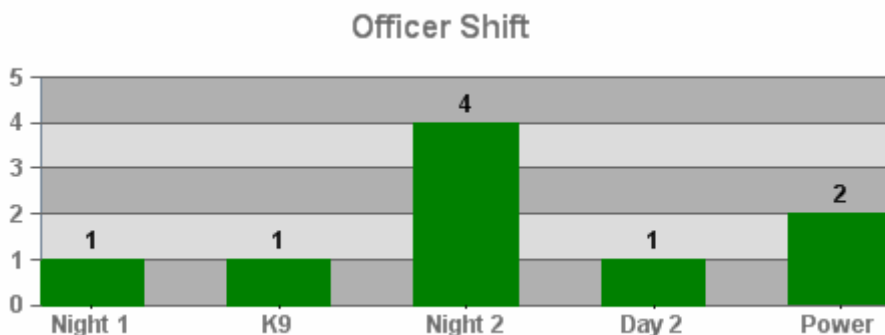

Policy compliance, officer assignment, and officer experience level are broken down by officers involved in pursuits not the pursuits themselves. There were nine officers involved in the six pursuits of 2005.

**Policy compliance and disciplinary actions:** Three officers (33%) were found to be non compliant; while six of the officers (67%) involved were found to be in compliance with pursuit policy. One of the non compliant findings resulted in the rewording of General Orders. The other two non compliant findings resulted in a Class II Investigation, which in turn resulted in additional training and counseling by a supervisor.

**Figure 17**

**Officer assignment:** Four officers (44%) involved were assigned to the patrol shift Night 2. Two officers (22%) were from the power shift. The K9 unit, Day 2 and Night 1 each had one officer involved. It seems that Night 2 is statistically more likely to initiate a pursuit than other shifts. Two of the four Night 2 officers involved in pursuits were on the same pursuit which means Night 2 initiated 3 (50%) of the total pursuits.

**Figure 18**

**Officer experience level:** The least senior involved officer had 0.83 years experience while the most senior involved officer had 9.25 years. The average experience level for officers involved in pursuits was 4.61 years. It is interesting to note 100% of the officers found to be in non-compliance had more than three years experience with the department.

Finally, it is interesting to note that four pursuits (66%) occurred during the first half of the year each occurring in consecutive months; then the second half of the year there was only two pursuits with no correlation of dates.

**Figure 19**
